

# Ascend® Smart In-Wall Timer

## Commercial 7-Day In-Wall Lighting Control

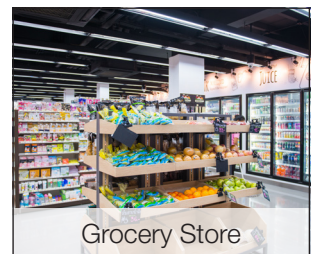

### A Simple In-Wall Solution to Stay Title 24 Compliant

Ensure commercial lighting projects stay up to code with the easy-to-install Ascend® Smart In-Wall Timer. The versatile 7-day timer can be installed or retrofit in a variety of indoor settings, including retail spaces, grocery stores, restaurants, churches and theaters, to help building owners stay compliant within 2019 guidelines.

#### Key Features:

- **Standalone Automation** – The Wi-Fi enabled Ascend Smart makes it easy for users to manage daily lighting schedules and improve energy efficiency. It provides many of the benefits of a complex automation system without all the hassle - no hub required.
- **Commercial Applications** – An excellent timer option for the commercial applications listed above, Ascend Smart delivers long-term value. See Title 24 Exception to Section 130.1(c)4 for complete details.
- **Anywhere Access** – From the office or across the globe, Ascend Smart allows business owners to manage lighting schedules with the swipe of a finger via the Intermatic App. Simply download the Ascend Smart Timer app to any Apple® or Android® device and go.
- **Manual Override** – A two-hour manual override feature promotes energy savings by automatically turning lights off after two hours when in Auto or Random Modes.
- **Secure Control** – A built-in Timer Lock feature allows users to secure the timer so that schedules cannot be changed without authorization.
