

Intermatic Refrigeration Technician NATE Certified Training

ICUBE™ Adaptive Defrost Control

Grässlin by Intermatic has developed a new adaptive defrost module for refrigerated walk-in freezers and coolers. An easy, versatile, innovative and affordable way to reduce defrost cycles by at least 40% per day while resolving countless other field related issues.

Training Program: The ICUBE™ saves your customers money by reducing energy usage associated with defrosting evaporator coils in walk-in coolers and freezers while resolving numerous other defrost related issues. In this 1-hour session you will learn how to install the ICUBE™ to save both money and energy for your customers. The ICUBE™ module can be field installed onto our existing DTAV40 defrost timer. Our complete unit, the DDT40 can be swapped out for any-existing defrost timer to achieve the same adaptive-defrost system. Quick, simple and affordable retrofit upgrade.
